<i>Training Job Specific</i>	There are not any particular "trade qualifications" that apply to our work, as it is specific to Pressurisation Units and Water Pressure Booster Sets - all of our Engineers undergo a thorough In House training programme, which we have developed over many years. It covers all aspects relating to the theory, application, maintenance and repair of these units and the systems they operate within. You will appreciate we cannot release full details of this as it is strictly "company confidential" (our competitors would be very eager to be able to match our training standards)
<i>Reportable accidents under RIDDOR in the last 12 months</i>	None
<i>Quality Assurance BSI ISO9001:</i>	Certificate no. FM33090
<i>Value of contracts undertaken</i>	£100.00 to £200,000.00
<i>Number of contracts terminated under the terms of the contract</i>	None

<p><i>Business Continuity & Succession</i></p>	<p>The Board of Directors review the training and succession of staff every 3 months. The company requires all staff to be adaptable, multi-skilled and fulfil a range of different roles within their individual skill sets. The Board promotes Vision, Motivation, Innovation and Education as key principles. Product and Service training is given to individuals so that they can fulfil different functions when the need arises. The Board also seeks to promote individuals from within the Group that have an understanding of Group's guiding principles and philosophy.</p>

References

On average we complete one approved contractor's questionnaire every working day, approximately 250 per annum. Almost all of these questionnaires request references and we don't wish to burden our clients with repeated requests for information. We have therefore adopted a policy of not supplying details from which references may be obtained. However you need to know if we are a reputable company so we have listed some our clients for whom we are approved contractors.

The company was formed in 1972 as a specialist in the supply, installation and maintenance of pressurisation units and water booster pumps sets. We are the leading specialist in the field and enjoy a good reputation for our delivery of service and expertise. We currently have in excess of £1.6m worth of maintenance contracts throughout the UK, just some of our clients are listed below.

Testimonials

<p>Gerry Humphreys Contracts Supervisor – Camberley – December 2009</p> <p>I wanted to mail over a thanks for Andrew yesterday, I run the contract and wanted to tell you how nice it was to meet an old style caring engineer. He was pleasant, polite and knowledgeable. He appears to have that "can do" approach to tasks without fuss and bother. We look forward to seeing him again for further works.</p>
<p>Mick Hepher – AELTA Wimbledon – September 2009</p> <p>Just a note to say how impressed I was with the actual installation of the pressure relief valve fitted at Wimbledon this week</p>
<p>Mark Fox-Andrews – Cheyne Gardens London August 2009</p> <p>Thank you for your patient assistance in helping me restart my water pumps yesterday-a nightmare all around! It was appreciated</p>
<p>Jaspal Sehmbi – Facilities Manager – Hospital – London South Bank July 2009</p> <p>I would like to thank you for a speedy attendance to a call out to our hospital on the 20th July 2009 and the professional attitude of your supervisor/engineer.</p>
<p>Gary Bristol – Site Manager – Insurance company Witham – April 2009</p>

Acorn Pressurisation Services Ltd
AGM House, London Road
Copford, Colchester, CO6 1GT

Thank you for the prompt response to my request for an engineer and I would like to let you know how pleased I was with the professionalism of your engineers. It was nice to see that old fashioned principles still exist; they were polite, respectful, helpful and thorough. These values seem to have been forgotten by some other companies.

Stefan Szecsei Chief Engineer Private Hospital Enfield – January 2009

Yesterday evening we had an emergency here at our hospital, we have lost water and the booster pump run dry. The issue of restarting was resolved by Tim giving me all the instruction on the phone, and we have managed to pressurise the system. Please thank Tim for his help, and professional attitude and his calm during our crisis situation.

Andy Townsend – Harpenden Herts Dec 2008

It's been another year with plenty of challenges and opportunities to pull out one's hair (if we have any left), but we've done well and have a high level of in-service installations across the country. Thanks for all your efforts in helping us to achieve and maintain this high service level and I look forward to our continued partnership next year.

Peter Allegri – Letchworth Herts Dec 2008

Just a quick note to say thank you for your companies efforts in carrying out the installation of the water booster set, our customer is extremely happy with the way in which the works were undertaken, and that they were up and running quicker than expected with very little inconvenience.

We would appreciate it if you would kindly express our gratitude to Ray and his team for carrying out such a commendable install.

Mr S Wall – Dagenham Essex Nov 2008

Your engineer did an excellent job for us on Monday and Tuesday at Lewis Gardens, for which I am very grateful, kindly pass on my thanks - We are in the process of shifting our contracts to you.

Mr R Bestel – London SW19 June 2008

“Thank you very much for all your help and your prompt response last night. It was greatly appreciated by all. I would also like to thank your engineer he was absolutely brilliant and walked me through everything step by step, despite it being the wee hours of the morning”

From Sister Ilona – Sayers Common, West Sussex. May 2008

“I want to thank you for looking after us so well for the last 30 years we have been here and sending Miles Drew who is the most efficient and knowledgeable and pleasant engineer we have ever known.”

From Mr Charles Bruce – Chatham Kent March 2008

“Met your engineer yesterday at Pembroke, Chatham, he was very helpful and completed all the work very efficiently”
