<i>Training Job Specific</i>	There are not any particular "trade qualifications" that apply to our work, as it is specific to Pressurisation Units and Water Pressure Booster Sets - all of our Engineers undergo a thorough In House training programme, which we have developed over many years. It covers all aspects relating to the theory, application, maintenance and repair of these units and the systems they operate within. You will appreciate we cannot release full details of this as it is strictly "company confidential" (our competitors would be very eager to be able to match our training standards)
<i>Reportable accidents under RIDDOR in the last 12 months</i>	None
<i>Quality Assurance BSI ISO9001:</i>	Certificate no. FM33090

<i>Value of contracts undertaken</i>	£100.00 to £250,000.00
<i>Number of contracts terminated under the terms of the contract</i>	None
<i>Business Continuity & Succession</i>	The Board of Directors review the training and succession of staff every 3 months. The company requires all staff to be adaptable, multi-skilled and fulfil a range of different roles within their individual skill sets. The Board promotes Vision, Motivation, Innovation and Education as key principles. Product and Service training is given to individuals so that they can fulfil different functions when the need arises. The Board also seeks to promote individuals from within the Group that have an understanding of Group's guiding principles and philosophy.

References

On average we complete one approved contractor's questionnaire every working day, approximately 250 per annum. Almost all of these questionnaires request references and we don't wish to burden our clients with repeated requests for information. We have therefore adopted a policy of not supplying details from which references may be obtained. However you need to know if we are a reputable company so we have listed some of our clients for whom we are approved contractors.

The company was formed in 1972 as a specialist in the supply, installation and maintenance of pressurisation units and water booster pumps sets. We are the leading specialist in the field and enjoy a good reputation for our delivery of service and expertise. We currently have in excess of £1.9m worth of maintenance contracts throughout the UK, just some of our clients are listed below.

Testimonials

Mike Hough – Hotel Manager – Manchester October 2011

It was very pleasing indeed to receive such a "can do" attitude from you and your engineer who attended at short notice. I am sure some would have walked away and said "new part needed" instead he got the unit to run without the missing part and effectively kept the hotel running.

Thanks again

Mike McCarthy – a London Borough – September 2011

Just like to say thanks for the continued excellent level of service we receive from your company and staff.

Once again thanks for your help.

James of Albert Mill September 2011

Martin was fantastic and went above and beyond to sort the lack of water and we are grateful to him returning to site to turn the water back on.

Steve Henley – Service Manager – June 2011 – Site London W1

Bit of feed back from Acorn's attendance yesterday. "Acorn Services" had previously attended this site and the comments from the client were "The guys that attended yesterday were very professional, polite and more suitable than the previous specialists"

David Tongue – Facilities Manager London – March 2011

I'd like to express my appreciation for the assistance of your engineer today when we suffered a leak following a 1" compression joint separating. Even though your engineer wasn't at our premises for that purpose, he was extremely helpful in getting the water turned off as quickly as possible and in offering assistance to trace the source of the problem upstairs. It was much appreciated.

Jacqui van der Brugge – Office Manager Wokingham – February 2011

I received a call from Fitzwilliam House where the expansion vessel was playing up. I gave your emergency number a call and Michaela, she was extremely helpful and managed to sort your engineer for the same day. Gary at Fitzwilliam mentioned that his engineer found yours to be very professional and helpful. Please pass on my thanks to both Michaela and the engineer for the very professional manner they showed me and my client on the weekend.

Vikki Seymour – School Bursar – November 2010

I would like to thank you very much for helping us with our problem and getting an engineer to us quickly.

Colin Butterworth – M&E Installer - November 2010

Just a quick word to say thanks for all your help the other day when we had problems changing over the pump sets. It made a nice change to have a technical dept that was actually cooperative and helpful.

Alex Yeung – Facilities Manager – Residential Apartments London – November 2010

So glad the water pump system is now 99% in full working order. Really please with the larger and more efficient air vessel tank. In the new year, we will replace the faulty water pressure gauge dial but not urgent right now. I was very happy with Ian's work and his professional and friendly manner, top guy.

Jennie Beales – Housing Services Essex October 2010

I've received a fax from the Scheme Manager from Crooked Elms regarding the recent works that Acorn has completed in the Boiler room. She wished along with several of the residents in the block to pass on their thanks for replacing the pump – they commented on how professional the workmen were and how quickly they were able to carry it out.
